How Zyto Evox Reframing works

By creating a visual map of our client's perception about a specific topic such as wellness, relationships, work, athletic performance. The Zyto Evox can help aid in any aspect of life they would like to improve.

The clients speaks about his or her topic and the Zyto EVOX records the voice. finding energy. The energy is then plotted into a Perception Index. Then the client can visually see their image of their perception on a monitor.

After voice energy is plotted, the client then meditates on the topic until their perception of the topic shifts.
